## Rules

Total 12 obligatory laboratory works. Each work is evaluated up to 10 points. Work consists of obligatory (6 points) and additional (4 points) parts. Obligatory part should be evaluated prior the additional part. If the work is done not according the schedule, only the obligatory part is evaluated (so the maximum evaluation is 6). Prior starting the new work all old works should be finished and evaluated. There will be three special laboratory works to allow student to get additional points or finish the obligatory parts of the works done not according the schedule.

Final mark is calculated from three intermediate exams (1IE, 2IE, 3IE) and laboratory works (LW):

$$FM = 1IE \times 0.2 + 2IE \times 0.2 + 3IE \times 0.2 + 0.4 \times LW$$

The student is allowed to pass an exam (or result is evaluated) if at least 80% of all obligatory laboratory works are finished.

The use of cell phones, books, lecture notes, browsing the Internet, or use of any other things which can be used for cheating is forbidden during the laboratory works and exams.

I have read and understood the rules of the subject
